

# 5025 RED D MIX™

## The Most Durable Five Gallon Gyro Mixer On The Market.

The 5025 Red D Mix contains an advanced direct-drive gear system that allows for optimal power transmission from the gear box to the rotating arm assembly. As a result, the gear design of the 5025 Red D Mix reduces wear items and provides superior repeatability and reliability.

By utilizing a gyroscopic mixing action, containers are mixed end-over-end while simultaneously spinning. The 5025 Red D Mix is capable of mixing a variety of materials for various applications and accepts standard plastic and metal five gallon containers.

- Extra wide opening and built-in roller allows you to quickly load and unload five gallon containers
- Low lift-height of 13 inches for easy loading
- 125 lb. standard load capacity for handling the most demanding applications
- Built-in roller assists with loading and unloading

### DIRECT-DRIVE GEAR SYSTEM

- Gear drive design eliminates the replacement of belts, pulleys and friction drives
- Gear drive prevents second axis motion slippage and reduces day-to-day wear for increased longevity of machine

The 5025 Red D Mix one-step clamping system

5025 Red D Mix Direct-Drive Gear System

| Model       | Description   | Timer         | WxDxH(in)                   | Shipping Weight(lb) |
|-------------|---|---------------|-----------------------------|---------------------|
| 5025-00-MRF | Standard, W/O Legs, 110V, 60Hz  | 4 Min. Manual | 36 x 37 <sup>1/2</sup> x 49 | 640 lb.             |
| 5025-00-PRF | Push Button, W/O Legs, 110V, 60Hz   | 2 & 3 Min.    | 36 x 37 <sup>1/2</sup> x 49 | 640 lb.             |
| 6784703     | Riser Leg Kit To Adjust To Corob Automatic Dispenser Height (For Use With Roller Racking)   |               |                             |                     |
| 6784699     | Riser Leg Kit To Adjust To FM 4000 Automatic Dispenser Height (For Use With Roller Racking) |               |                             |                     |
| 6784700     | Riser Leg Kit To Adjust To FM 8000 Automatic Dispenser Height (For Use With Roller Racking) |               |                             |                     |
