

Dry & View Your Color Samples...All In One Unit!

The days of rigging up a hair dryer to dry samples and walking outside to view your colors are over! By bringing together two crucial steps for accurately matching color, the new Dry-N-View conveniently dries samples and allows you to view colors - all in one unit. The Dry-N-View utilizes three light sources (Daytime, Incandescent, Fluorescent) and a quick low-heat drying system to ensure your color samples are properly matched.

Drying System:

- Quick low-heat drying delivers accurate color sample results every time - will not distort samples due to intense heat like conventional hair dryers
- Dries multiple samples with the push of a button
- No more blown breakers - draws only 3 amps vs. 15 amps like conventional hair dryers
- Extremely quiet drying system allows you to use Dry-N-View right next to the phone or retail counter
- Industrial drying system designed to outlast conventional hair dryers
- Automatically shuts off when your sample is dry
- Zero maintenance drying system

The Viewing Station:

- Comes complete with three different light sources (Daytime, Incandescent, Fluorescent) for viewing color samples in various settings
- Built-in viewing station ensures your color swatch matches your dried sample

Model	Description	Timer	WxDxH(in)	Shipping Weight(lb)
3100-PB	Drying & Color Viewing System 110V, 60Hz	3 & 5 Min. Push Button	12 x 13 x 18	28 lbs.
